

## Delaney Creek

8-16-70 Ammatelli

Observation: no visible flow of any kind  
~100 ft after site; appears to be slightly  
fewer trickles than 1 week ago

Volumetric Flow @ ~3:40-3:50 PM PDT

- |                  |                  |
|------------------|------------------|
| 1. 835 mL in 30s | 4. 810 mL in 30s |
| 2. 770 mL in 30s | 5. 800 mL in 30s |
| 3. 830 mL in 30s | 6. 845 mL in 30s |

Other Trials :  
960 mL in 35s  
685 mL in 25s  
785 mL in 10s

\* Note: there were small ripples in pool below  
water trickle  $\Rightarrow$  all volumes underestimate

Type Down: 3.87' @ 3:50 PM PDT

Observation: Unlike previous two  
visits, no evident trickles on  
orange slab midway to site
